

bt-analyze®

SKIN IDENTIFICATION

Using a sophisticated sensor, the ergonomic multi functional design of the bt-analyze uses advanced technology to calculate moisture levels on the skin. Use in multiple zones to clearly define the skin care needs of each area. Readings are saved and displayed on the intelligently designed LCD screen for documenting at the end of the analysis. This tool offers quick scientific guidance to clients and allows them to be an active participant in understanding their skin function and need for specific topical products and services to reach their goals. The bt-analyze should be used both before and after each service to capture improvements made, and to note modifications needed.

FEATURES AND SPECIFICATIONS

Weight (with batteries): 2.33 oz
Width: 3.375"
Height: 3.5"
Depth: .875"
Power: 2 AAA batteries

Easy to view LCD display
Large sensor
Precise measurements with delineation to the tenth
7 memory measurement function
Easy to sanitize with disinfectant wipes
Fits perfectly in the bt-techbelt™

INCLUDED

bt-analyze
Operation Manual
Quick Start Guide
